I sincerely hope that the plans for the above include a new primary school, a new secondary school, plus a doctors surgery and dentists surgery.
How on earth are our local schools, doctors etc., expected to cope with this influx of new families. I understand the need to build more housing, but please put strategies in the infrastructure in place to cope first....

I FULLY OPPOSE THESE PLANS IF THE ABOVE STRATEGIES ARE NOT PUT INTO PLACE.

I have lived in kingswinford for most of my life, in fact since when it was a 'village', but during the last 10/20 years the traffic through our village and the surrounding area as been atrocious. How on earth are we expected to cope with extra traffic a further 650 houses will generate?

I look forward to your response with interest
